

Are You Bored Of Traveling  
To Same Old Places In Earth?

Why Don't You Try  
Something New Out Of Earth?

What About  
Mars?

way better than earth, kinda hot but idk Its surface is rocky, with canyons, volcanoes, dry lake beds and craters all over it. Red dust covers most of its surface. Mars has clouds and wind just like Earth. Sometimes the wind blows the red dust into a dust storm. Tiny dust storms can look like tornados, and large ones can be seen from Earth.

Saturn is also  
cool to visit
